

～ 下水道を使用される皆様へ ～

# 大切に使ってね！みんなの下水道

Let's use it carefully! Everyone's Sewerage System

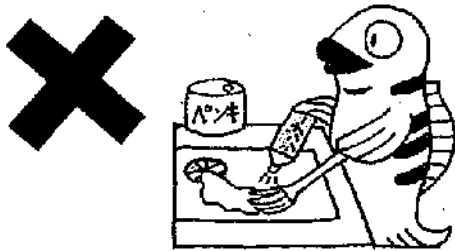

ルールを守らないと下水道施設を破損したり、処理機能を低下させて、みんなが迷惑することになります。一人ひとりが注意して、大切に使用してください。

ギョッピー

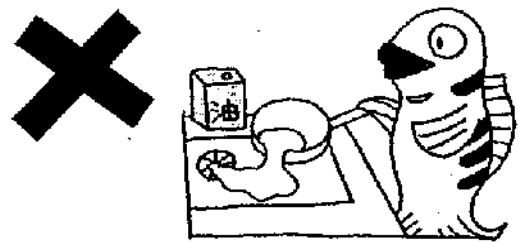

## Never pour gasoline, thinner, petroleum, waste oil, cement, etc.

Not only is it difficult to dispose of, but it also poses the risk of explosion.

## Do not pour tempura oil or salad oil down the drain

Oil will solidify and stick to sewer pipes, obstructing the flow of wastewater. Please allow oil to solidify or absorb it with paper and dispose of it as combustible waste.

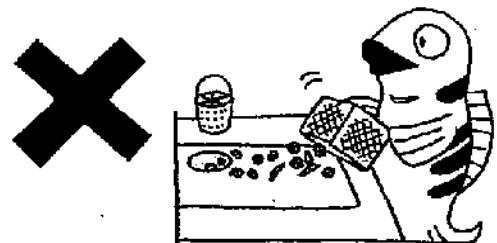

## Do not use acidic cleaners

When cleaning the toilet bowl, use water, lukewarm water and neutral detergent, and when washing dishes or doing laundry, use a phosphorus-free detergent.

## Do not flush vegetable scraps, hair, gum, etc.

Do not flush food waste, hair, or other items that do not dissolve in water, as this may cause clogging.

## Dissolvable paper for flush toilets

Please dispose of all trash other than water-soluble paper such as toilet paper in the waste bin. If the toilet gets clogged, it will be difficult to repair.

## Do not throw sand or garbage into manholes or manholes

Manholes and manholes are for inspecting and repairing sewer pipes. Please do not throw sand or trash into them.
